It would be a commendable policy for San Marcos to reserve several acres of land suitable for a part. One could be secured, unrivalled in the world for beauty. Mussrs. Rapp, Haynes, and other gen

> The Literary Revolution. CHANGE OF BASE.

This very remarkable enterprise continues to make such progress as to matconish its friends and astound its enemies. Its greath iscressing proportions have compelled the removal of its head quarters from the Tribune building to the very large and besutiful building. No. 764 Broadway, which is in the very mides of the "book district" of New York City, and, therefore, of the publishing enterprise of the nation. This building, though six stories in height, 25 feet front, and 100 feet deep, is sufficient only for the offices and retail store of the company. The manufacturing is carried on in several large buildings located in other parts of the city, though it is contemplated concentrating them soon in one immense factory to be creeted. Their list of recent and forthcoming publications are extremely interest in literature. The Library Magasiae is unique in both form and character and altogether delightful is the richness of its contents. Of the books a nonneed, Green's larger "History of the English People," reduced from \$10 to \$1; Carlyle's "History of the Fren h Revolution," reduced to forty cents; Carlyle's "Heroes and Hero Worship," twenty five cents, and the "Revised New Testament," which is promised to be men ulmetured with rapidity heretofore un heard of, will attract special attention. It is worth while for every one who has not already seen it, to send and get the illustrated pamphlet, "Book Making, and Type Setting by Steam," which will be sent free upon application.
